

CHANGE YOUR LIFE

GIVE YOURSELF A SECOND CHANCE™

PLAN YOUR TRIP TODAY

Our Mission

At Second Chance™ our goal is to give humanity a new shot at life- and to enjoy the experience along the way.

Here at Second Chance™ we know that starts with **you**. In order to give every person the best relocation experience, we've worked hard to make our trips as accessible and reliable possible.

Sure or unsure, we've formulated our Rapid and Steady Chance packages to aid you in your decision and relocation, with additional discounts for expecting or established families.

On board all of our ships are teams of trained medical staff and 24/7 support from crew members, to make sure every passenger is safe and comfortable.

At your destination on one of our many colonies on Pluto, you will immediately be escorted to your new home and given a couple days to settle in before starting your new job, and your new life.

Your Mission

You're here for a reason. Whether that be a high-paying job, steady housing, a safe place for you to grow your family, or a mix of all 3.

Life right now may be unfulfilling, and you know you and your family deserve better.

Our team knows that every person is valuable and deserves to have a good life, starting with a reliable job and housing, with space and freedom to find yourself in a new community.

Fulfill your dreams and relocate to a colony of your choice.

We have your back every step of the way.

LEARN MORE

WHY SECOND CHANCE™?

Second Chance™ is a project dedicated to creating the ultimate home away from home, in the furthest reach from our solar system, in the dwarf planet Pluto.

WHY PLUTO?
You may know Pluto to be extremely dark, cold, and icy. That's what it used to be, but now our teams of engineers and builders have transformed many parts of the once desolate dwarf to warm, reliable, safe cities.

This project has been in the works for over 80 years, with many brave volunteers testing the various buildings and heating systems, raising crops and families on every colony.

Results show that every colony has been 100% stable in terms of heating, housing and agriculture for over 30 years, with updated systems being gradually implemented frequently to increase security and stability. Many of the original families from over 60 years ago are still living on their colonies, now with established generations of their lineage.
